Elsevier Science B.V., Amsterdam

Author Index

Anderson, M.A., 103
Arendt, M., 143
Ashley, C.S., 85
Athayde, A.L., 299

Baker, R.W., 299
Bikson, B., 313
Brinker, C.J., 85
Brumlik, C.J., 249

Cabasso, I., 143
Collins, G.E., 249

Deshpande, R., 85

Edlund, D.J., 111

Freeman, B.D., 67
Fujisaki, S., 183

Greenberg, A.R., 255, 281

Hietala, S.L., 85
Higuchi, A., 183
Hill Jr., C.G., 103
Hopfenberg, H.B., 67
Hwang, S.-T., 213

Kampa, J., 121
Klotz, H.C., 195
Koops, G.H., 329
Krantz, W.B., 255, 281

Lagow, R.J., 121
Langsam, M., 195
Le Roux, J.D., 121, 143
Li, S.-G., 329
Loy, D., 85

Martin, C.R., 249
Meier, I.K., 195
Miranda, N.R., 67
Mulder, M.H.V., 329
Muruganandam, N., 313

Elsevier Science B.V., Amsterdam

Subject Index

asymmetric membranes, 121

barrier membranes, 67

cellulose acetate, 255, 281
ceramic membranes, 103
composite membranes, 85, 249, 299, 313
contained liquid membrane, 163

dense polymer films, 281
diffusion, 183
dry-cast model, 255
dry-cast process, 281
dynamic contact angle analysis, 143

fiber membranes, 329
fluorination, 143

gas and vapor permeation, 67, 103, 195, 249
gas permeation, 183
gas separations, 1, 85, 121, 143, 163, 195, 213, 225, 249, 299, 313, 329
gas transport in polymers, 1
glass membranes, 85

high pressure, 163
hollow fiber, 163
hydrogen sulfide, 111

inorganic membranes, 85
integrally-skinned asymmetric membrane, 143

liquid crystalline polymers, 67

macrovoids, 281
membrane formation, 281
membrane preparation and structure, 121, 249, 299, 313
membrane reactors, 111
membrane separation processes, 1
membrane structure, 183
metal membranes, 111, 299
microporous and porous membranes, 85, 103, 255
morphological studies, 281

natural gas, 111

organic separations, 249

palladium/silver alloys, 299
pervaporation, 329
poly(dimethylsiloxane), 183
polyimides, 195
polymer blends, 313
polymer membranes, 1
polysulfone, 121, 143
poly[1-(trimethylsilyl)-1-propyne], 183
process optimizations, 225

recycle permeator, 213
retentate recycle, 213

solubility and partitioning, 67
spinneret, 329
sputter deposition, 299
surface fluorination, 121
surface modification, 143, 195

technical developments, 225
theory, 255
thermodynamics, 255

X-ray photoelectron spectroscopy, 143

1994 Elsevier Science B.V.
